

Cetex Petrochemicals Ltd

CETEX ENERPOL 7535 - DIESEL ADDITIVE

APPLICATION

- Reduce injector nozzle fouling in diesel engines.
- Reduce corrosion in tanks and lines containing the fuel.
- Reduce foaming during tank filling, allowing quicker and cleaner operations.
- It also contains a component, which is designed to increase the cetane number of the fuel, improving its combustion characteristics and cold starting ability, and reducing smoke and engine noise.

This performance package is formulated with solvents to optimise solubility and dissolution in diesel fuels.

HEALTH AND SAFETY

It is recommended that the product is subjected to mixing or agitation during its storage.

It is essential to use this additive in a clean environment, and minimize water contact. In order to obtain the maximum premium fuel quality due care should be taken with housekeeping of injection and distribution systems,

Avoid skin contact, use with adequate ventilation and protective clothing
