

Cetex Petrochemicals Ltd

PHENLY PROPYL ALCOHOL

APPLICATIONS

Used in flavor, fragrance and pharmaceutical industries

In pharma industries, used for the manufacture of phenyl propanolamine, fluoxetine, 3-phenyl propyl carbamate etc.,

In cosmetic industries, used as a preservative as it has antimicrobial properties against bacteria and moulds.

Used in combination with Heliatropin or Piperonal as a preservative for cosmetic products.

In fragrance industries, used as a fragrance component in fresh flower composition like lilac and lily of the valley, because of the balsamic odour character. Also used as flavoring in alcoholic beverages.
